Mobile and Cloud powered prosperity in The Philippines

Connect : TV White space empowers Bohol community

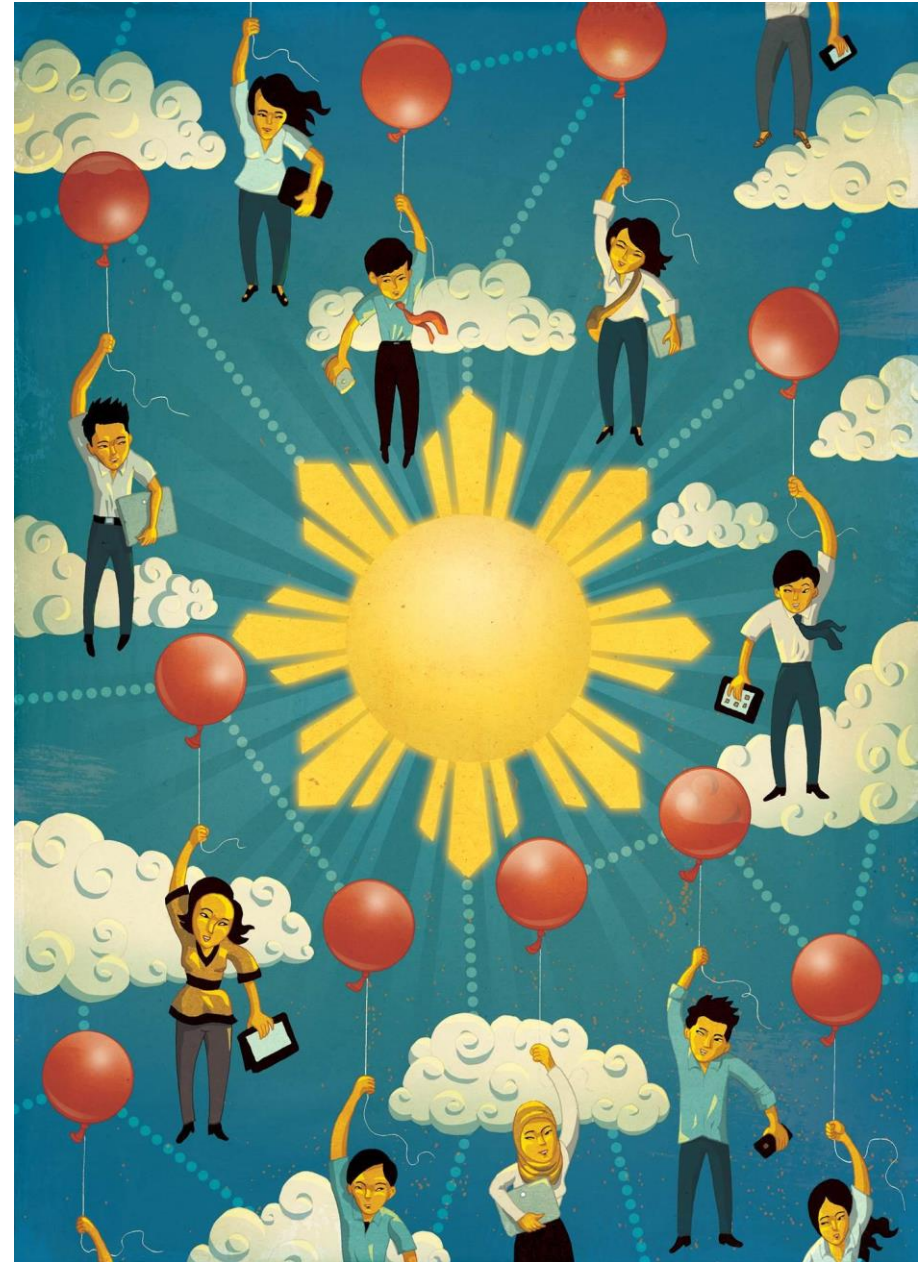

US Secretary of State John Kerry presented [Microsoft Philippines](#) with the prestigious P3 Impact Award for the TV White Space project in Bohol

The Partnership extends free internet access to [20,000](#) people who previously did not have access

The government has expanded the use of TV White Space to other locations in the Philippines to support its goal of providing wireless Internet access to [99 percent of its population](#)

Shared Prosperity: An ICT Manifesto for the Philippines for 2016 and Beyond

Implement additional reforms in the educational system to improve competencies and compensation of teachers. This should include stepping up STEM education and enhancing the digital literacy of educators.

Address the digital divide and bring universal access to affordable broadband using both policy and technical solutions. This will help create a foundation for long term inclusive development for all Filipinos.

Increase the adoption of information and communication technology (ICT) by national and local government units in order to improve the delivery of government services.

Thank You
