

Request for Proposal (RFP)

For: Consultancy opportunity on TNE policy and capacity building for the Philippines – local consultant

Date: 15 June 2022

1 Overview of the British Council

1.1 The British Council is the UK's international organisation for cultural relations and educational opportunities. We create friendly knowledge and understanding between the people of the UK and other countries. We do this by making a positive contribution to the UK and the countries we work with – changing lives by creating opportunities, building connections and engendering trust.

1.2 We work with over 100 countries across the world in the fields of arts and culture, English language, education and civil society. Last year we reached over 80 million people directly and 791 million people overall including online, broadcasts and publications. Founded in 1934, we are a UK charity governed by Royal Charter and a UK public body. Further information can be viewed at www.britishcouncil.org.

2 Introduction and Background to the Project / Programme

2.1 The British Council in the Philippines has been working closely with the Commission on Higher Education (CHED), the government agency responsible for higher education in the Philippines, on several projects since 2016. One of these collaborations is the Joint Development of Niche Programmes through Philippine-UK Linkages (JDNP), a pilot project on transnational education (TNE). JDNP, which ran from 2016 to 2018, provided catalyst grant for Philippine universities to build capacity on TNE and develop joint and double postgraduate degrees with the UK. At the end of the project, through partnerships between 11 Philippine and nine UK universities, we introduced 17 UK-Philippine master's and PhD degrees in niche areas.

2.2 In support of the implementation of the JDNP project, CHED released a memorandum in 2016 (Annex 4) containing policies, standards and guidelines for TNE. The memorandum outlined, among others, categories of TNE, eligibility for overseas and Philippine institutions to offer TNE, and registration guidelines and procedures. The document applies to all TNE partnerships in the country, and not only those created in the JDNP project.

2.3 In 2019, the Philippines passed the Transnational Higher Education Law (Annex 5) to expand 'access to educational services through the establishment and administration of transnational higher education'. This law will accelerate TNE partnerships between foreign and local universities, and mandates CHED to establish a dedicated office for TNE and to set a comprehensive national TNE strategy. It is also envisioned to open opportunities for more TNE models such as franchising, articulation, validation, branch campus, among others. It will also grant tax incentives to institutions with TNE, including foreign universities setting up branch campuses in the Philippines, as well as expedite processing of applications and permits such as professional licensing, visa and other immigration requirements for foreign faculty and students. As of 2021, the Implementing Rules and Regulations for the law is awaiting approval from a number of Philippine government bodies.

2.4 The success of TNE in the country and the increasing interest among Filipino universities to pursue transnational partnerships with the UK gave rise to a multi-year collaboration between the British Council and CHED called the Access and Competitiveness through Internationalisation of Higher Education (ACT-IHE). The new project, launched in 2021, seeks to widen access to quality education and build competitiveness of Filipino higher education institutions on international higher education by strengthening their capacity to internationalise. ACT-IHE contributes to the Philippines' efforts in modernising higher education through internationalisation and TNE, and will support the implementation of the Transnational Higher Education Law. One of the outputs of the project is to create five new UK-Philippine postgraduate programmes.

2.5 Also under ACT-IHE, the British Council, in partnership with Advance HE, is co-developing a TNE toolkit for the Philippines. The toolkit, expected to be completed in October 2022, is envisioned to be used by foreign and local universities looking to understand the setting up and offering of TNE programmes in the Philippines.

2.6 CHED has the mandate to translate the TNHE law into actions. To ensure that it is fully able to carry out this mission, key offices in CHED and other relevant government agencies will need capacity strengthening interventions. Key government officials, directors and technical staff would need to possess necessary knowledge and skills on TNE policy development, management and governance. There needs to be a critical pool of inter-agency experts across different government agencies who will have persistent rededication to setting up enabling environment for transnational higher education in the Philippines.

2.7 An enabling policy environment needs to be created to effectively implement the new law and fully realise the TNE aspirations of the Philippines. In this regard, the British Council and CHED is implementing a new project, the **Leadership, Management and Policy Capacity for Transnational Higher Education**, starting in 2022. The project aims to identify and set up the governance structure of the TNE law; build the knowledge and understanding of key stakeholders from the Philippine government on various areas of TNE; and develop a national TNE strategy that will support the implementation of the TNE law.

2.8 Under this project, we are enhancing the knowledge base of policy and decisionmakers in CHED, select government bodies and other relevant stakeholders in implementing high quality TNE initiatives. We will create a pool of inter-agency champions, identified through systems assessment and stakeholder mapping, who will work to influence policies, actions, and decisions of their respective agencies to create an enabling policy environment for TNE in the Philippines. By providing key government officials and policymakers opportunities for immersion visits, benchmarking activities, global case studies and technical inputs, this project will build understanding on the following key TNE areas, among others identified in the course of the project:

- Fundamentals of TNE and cross-border education: overview of TNE, international code on the practice of cross-border education, TNE trends, models, future developments and best practices.
- Policy formulation and execution: enhancing and developing the skills and knowledge of policymakers in policy formulation and implementation, writing of policy brief as well as the integration of gender and inclusion concerns into the policy making process. This training will also look at what constitutes enabling policies that makes for successful delivery of quality TNE.
- Management and leadership: equipping policymakers and government leaders with TNE-specific leadership skills and management tools in effectively governing and delivering TNE partnership projects.
- Quality assurance: strategies and tools used to ensure high quality, relevance and sustainability of TNE programmes.
- Monitoring, evaluation and learning of TNE: frameworks, metrics and assessment tools to evaluate the impact of TNE policies, partnerships and programmes.

2.9 **We are looking for a consultant from the Philippines who will work with the lead UK consultants on the implementation of this project. The local consultant will ground the work of the UK consultants to the Philippine context using their expertise in Philippine higher education policy and knowledge of local legislations and policies relevant to higher education.**

13 Evaluation Criteria

13.1 You will have your Proposal evaluated as set out below:

Stage 1: Proposals will be checked to ensure that they have been completed correctly and all necessary information has been provided. Responses correctly completed with all relevant information being provided and all mandatory requirements as outlined in Section 8 met will proceed to Stage 2. Any Proposal not correctly completed in accordance with the requirements of this RFP and/or containing omissions may be rejected at this point. Where a Proposal is rejected at this point it will automatically be disqualified and will not be further evaluated.

Stage 2: If a bidder succeeds in passing Stages 1 of the evaluation, then it will have its Proposal evaluated in accordance with the evaluation methodology set out below.

13.2 Award Criteria – Responses from potential suppliers will be assessed to determine the most economically advantages proposal using the following criteria and weightings and will be assessed entirely on your response submitted:

Criteria	Weighting
Social value	10%
Methodology and approach	35%
Knowledge of the sector, professional experience, qualifications and competencies	35%
Pricing	20%

13.3 Scoring Model – Proposals will be subject to an initial review at the start of Stage 2 of the evaluation process. Any Proposals not meeting mandatory requirements or constraints (if any) will be rejected in full at this point and will not be assessed or scored further. Proposals not so rejected will be scored by an evaluation panel appointed by the British Council for all criteria other than Commercial using the following scoring model:

Points	Interpretation
10	Excellent – Overall the response demonstrates that the bidder meets all areas of the requirement and provides all of the areas evidence requested in the level of detail requested. This, therefore, is a detailed excellent response that meets all aspects of the requirement leaving no ambiguity as to whether the bidder can meet the requirement.
7	Good – Overall the response demonstrates that the bidder meets all areas of the requirement and provides all of the areas of evidence requested, but contains some trivial omissions in relation to the level of detail requested in terms of either the response or the evidence. This, therefore, is a good response that meets all aspects of the requirement with only a trivial level ambiguity due the bidders failure to provide all information at the level of detail requested.
5	Adequate – Overall the response demonstrates that the bidder meets all areas of the requirement, but not all of the areas of evidence requested have been provided. This, therefore, is an adequate response, but with some limited ambiguity as to whether the bidder can meet the requirement due to the bidder’s failure to provide all of the evidence requested.
3	Poor – The response does not demonstrate that the bidder meets the requirement in one or more areas. This, therefore, is a poor response with significant ambiguity as to whether the bidder can meet the requirement due to the failure by the bidder to show that it meets one or more areas of the requirement.
0	Unacceptable – The response is non-compliant with the requirements of the RFP and/or no response has been provided.

13.4 Commercial Evaluation – Your “Overall Price” (as calculated in accordance with requirements of Annex 3 (Pricing Approach) for the goods and/or services will be evaluated by the evaluation panel for the purposes of the commercial evaluation, further information on this approach may be available in Annex 3. In the event that any prices are expressed as being subject to any pricing assumptions, qualifications or indexation not provided for by the British Council as part of the pricing approach, the British Council may reject the full Proposal at this point. The British Council may also reject any Proposal where the Overall Price for the goods and/or services is considered by the British Council to be abnormally low following the relevant processes set out under the EU procurement rules. A maximum offer score of 10 will be awarded to the Proposal offering the lowest “Overall Price”. Other Proposals will be awarded a mark by application of the following formula: (Lowest Overall Price/Overall Price being evaluated) x 10 (rounded to two decimal places) = commercial score.

13.5 Moderation and application of weightings – The evaluation panel appointed for this Procurement Process will meet to agree and moderate scores for each award criteria. Final scores in terms of a percentage of the overall Proposal score will be obtained by applying the relevant weighting factors set out as part of the award criteria table above. The percentage scores for each award criteria will be amalgamated to give a percentage score out of 100.

13.6 The Winning Proposal(s) - The winning Proposal shall be the Proposal scoring the highest percentage score out of 100 when applying the above evaluation methodology, which is also supported by any required verification evidence (to include, without limitation, any updated information)] obtained by the Authority relating to any self-certification or other requirements referred to at any time in this Procurement Process.
